

SEQUENCE VALVE

(Pilot Operated, Kick-down)

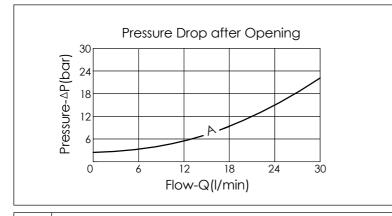

TECHNICAL DATA		
Max. Operating pressure: 350 bar		
Rated flow:	30	I/min
Cavity-Tooling:	163A-3	
Installation torque:	27 - 33	Nm
Weight:	0.11 (Z =L)	kg
This valve is a special type pressure control valve. When the inlet port is lower than pressure setting.		

the valve will remain close.

The valve goes full open if the setting pressure is reached. Even if the pressure of sequence port makes the pressure drop be lower than setting pressure and the valve remains

open status, the flow has to be stopped so as to make the valve reseat and close.

X	OPERATION	
30	Standard Type	

- · Response Time-Typical (25 ms)
- · Maximum Leakage Approximately (30 cc/min./70 bar)

SPRINGS	
ADJUSTMENT RANGES	
5 - 210 bar (70 bar Standard Setting)	
5 - 105 bar (70 bar Standard Setting)	
5 - 420 bar (70 bar Standard Setting)	
5 - 55 bar (28 bar Standard Setting)	
5 - 28 bar (14 bar Standard Setting)	
5 - 315 bar (70 bar Standard Setting)	
	ADJUSTMENT RANGES 5 - 210 bar (70 bar Standard Setting) 5 - 105 bar (70 bar Standard Setting) 5 - 420 bar (70 bar Standard Setting) 5 - 55 bar (28 bar Standard Setting) 5 - 28 bar (14 bar Standard Setting)

Z	OPTIONS
L	Leakproof hex. socket screw.
K	Handknob with Lock Knob. (Order Code: 7ZAK001)
С	Stainless Steel Tamper Resistant Cover.
