Y	OPERATION
09	Normally-Closed, No Reverse Flow Energized, Nose-in, Side-out Operation

This valve is similar to check valve when de-energized. Allow free flow from port ② to port ① and block flow from port ① to port ②. In energized condition, this valve is allowed flow from port ① to port ② but it's difficult to pass that flow from port ② to port ①. If you need bi-directional flow, please refer Y=03.
