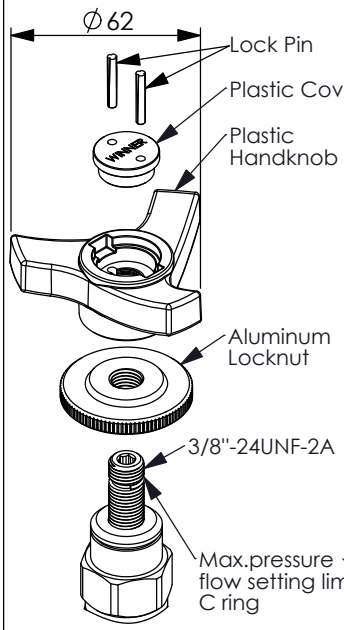
7ZAT001



1.Remove stop ring and replace lock nut with aluminum lock knob.
2.Reinstall stop ring.
3.Install handknob until contact is made with the stop ring.
4.Insert pins in the cover so that they project thru the cover.
5.Put the cover on with inserted pins and drive pins in until flush with the cover.

∗Note: The three-winged handknob kit cannot reassemble after completing. Please tighten screw thoroughly and make sure the adjustment range is enough. If you have any question, please contact Winner's sale department.

The appearance and the dimension are only for reference.
